Node

## Languages

English

Spanish

## WORK EXPERIENCE

### Ingenico ePayments

(11/2017 – 03/2020)

- Developer of the “Developer’s zone” portal, to explain users how to manage the SDK provided by the company, using ReactJs, this allowed to give merchants a better and cleaner documentation instead of a PDF document.
- Improvements in others portals owned by the company, to assure the quickest load time and best resource handling.
- Developer in ReactJS NPS SDK, to help other site developers to integrate in the company payment gateway.

### MRM//McCann

(05/2017 – 09/2017)

- Site migration, from using a custom and outdated JS Framework to React.
- Developer of new modules to replace old functions or repetitive process for this new site.
- Helped to improve and update old sites stylesheet using less and their behavior using plain Javascript

### BLANCLINK

(08/2016 – 12/2016)

- Developed frontend logic for a Retention Tool of a Call Center, using Angular.
- Developed backend functionality with PHP 5.6 – 7 to create an API REST for an Android application.
- Integrated the Technical Planning Committee to standardize front end technologies, stacks, tests and methodologies.

## Education

“Valle del Momboy” College

(2012)

Computer Engineering
